"A BIG TEAM."

"Chaudler was excused from further service on the Committee of Mines and Mining, and Jones was appointed to his place."—To-day's Telegram.

This is well. The committee has been

relieved from the presence of a drunken ignoramus, and an able and talented Senator appointed in his place-one who is well acquainted with the subject on which he is called to legislate. Nevada has reason for congratulation that a Senator who is versed in the matter upon which he is required to give an opinion is one with which he is thoroughly acquainted, and would still more have reason for felicitation if we could double the team and send a man to assist Mr. Jones in the Senate, whose means and position will render him inaccessible to any ordinary temptation. This is what we want, and probably should secure if Mr. Sharon should be selected as Mr. Jones' coadintor. We would then have a heavy team, neither one of which would be liable to be accused of any petty corruption. They are both wealthy men, and that wealth has been acquired by their own skill and exertions, and is largely anyested in the mining enterprises of this State; and they are likely to feel as quickly as any one the encroachments with which any blunder headed eastern Congressmen is likely to attack the hardly won rights of our miners. We all know that with some few exceptions, this country is looked upon as a terra incognita. The way to, or from which goes and ends nowhere. The eastern politicians have always regarded this coast as fair game, and would willingly do anything with or in relation to the mines that would make political capital, no matter whether that action was prompted by justice or the reverse. The people of Nevada then, should take some pains to secure the election of a man whose qualities and acquirements are well calculated to do them honor, and protect their interests. Under existing circumstances, there is no doubt that the most eligible candidate is Mr. Sharon. We cannot but believe that his election will be the termination of the struggle, and we have reason to hope that our faith in his usefulness will be rather confirmed than impaired by his future conduct in the Senate if elected. We shall then have a strong team. They will be inaccessible to all minor considerations, and will have no necessity or inclination to act simply as an attorney for this railroad or that elique. Jones and Sharon as Senators, would then represent the State and not a ring. That would be a privilege Nevada has not hitherto enjoyed.

THE accounts of the foundering of the French Trans-Atlantic Steamship Company's steamer Europa, are yet very mixed. The telegrams concerning the wreck are yet quite unintelligable and probably we shall have to wait for advices per mail before anything like a straightforward account can be had. All that can be gleaned so far is that the vessel was lost and the passengers saved. While the officers and craw of the lost vessel, and that one which went to its rescue, are making accusations and recriminations against each other. It is a queer affair altogether.

SUPREME JUNGE. Yesterday J. Foster informed us that Judge W. H. Beatty, who since 1864 has been Judge of Lander and also of White Pine counties, is a candidate for the position of Supreme Judge. We have had a long and intimate acquaintance with Judge passed. Beatty, and can bear testimony that he is a man of marked ability, incorruptible integrity, and whose judicial rulings were always dictated by an evident desire to deal out impartial justice to all who had business in his court.

THE Scientific American has a long article on "how greenbacks are canceled." There is only one way to cancel them decently and honorably, and that is to pay them in good hard gold coin. The honor and credit of the American people are involved in this issue. They must never, they will never forget, that the pay them. In this respect communities stand on the same ground as individuals, and nations as communities.

Tue new Chief Justice of the United States has just delivered an opinion on the point whether the stock of National Banks was taxable property. This has been decided for and against the proposition, and it will be well for all concerned to reach some authoritative decision The telegram published is somewhat too meagre to tell whether the main point was reached or not.

THOUGH the Raymond & Ely is not as productive as it once was, it will see many bright days yet; and other mines, particularly the Pioche-Phœnix, are said to be looking remarkably well. Pioche will come out all right, we fully believe. [Eurek Coned.]
